NP Project2 Supplementary

NP TA

Select may be interrupted by signal

```
If (select(maxfd+1, &read_set, NULL, NULL, NULL) < 0) {
     //may be interrupted by signal or other errors
}
for (fd = 0; fd < maxfd; ++fd) {
     if (FD_ISSET(fd, &read_set)) {
          //handle fd
     }
}
```

Don't send additional '\0' through socket

- char str[] = "Hello"
- write(fd, buf, **sizeof**(str)) ⟵ **sizeof(str) is 6: "Hello\0"**
- write(fd), buf, **strlen**(str)) ⟵ **OK**

- string str = "Hello";
- write(fd, str.c_str(), str.length()) ⟵ **OK**
